

BANKING FOR A CLEANER FUTURE

Our mission-driven credit union is committed to building a world in which everyone can participate in the clean energy movement. Our deposit accounts fight climate change and support the clean energy movement by helping others afford clean energy and reduce carbon emissions.

Savings Account

Your savings can help save the planet while earning you interest. Our savings accounts make it easy to transfer funds between Clean Energy Credit Union and other financial institutions via free ACH transfers on your computer or mobile device.

Checking Account

Our checking accounts offer the conveniences you need with great rewards. Earn 3.5% APY on balances up to \$15,000 and enjoy the perks of no overdraft fees or minimum balances required. Accessing and managing your account is a breeze with our eco-friendly debit cards, mobile card controls and free withdrawals at 32,000+ MoneyPass® shared ATM machines.

Money Market

Money market accounts pay competitive, tiered rates on balances of \$2,500 or more while allowing you ready access to those funds when you need them. You'll be able to easily transfer funds between your accounts at Clean Energy Credit Union and other financial institutions via free ACH transfers on your computer or mobile device.

CD

Our CDs are similar to U.S. Treasury Bills or municipal bonds in that they're low-risk, income-generating investments; however, Clean Energy CDs have a uniquely positive impact on our environment and economy by helping other Credit Union members afford to use clean energy – and they're federally insured.

IRA

An IRA offers a tax-advantaged way to save money for retirement. Your IRA dollars are federally insured up to \$250,000, making IRAs a great place for the lower-risk portion of your portfolio. Contributions may be included in your previous year's tax returns until April 15th of each year.
